№ 440/18-10 from 20.09.2018

«On cooperation»

"Ecomash+Ural" OOO was founded in 2007. All production facilities (mechanical and electrical industries) and area businesses (6,000 m<sup>2</sup>) are owned and located in Novouralsk at Sverdlovsk region.

The **machining workshop** includes quality control, procuring area, turning-milling area, the plot of CNC machine tools, heat treatment, grinding station, the welding station, the site washing details, the packing area.

Mechanical production is equipped with a modern machine park, which is based on turning and milling centers with CNC. In addition, the company uses a wide range of universal turning, boring, milling, planing, grinding, welding and heat treatment equipment.

**Electrotechnical production** specializes in single and serial production of the equipment for automation and power supply of low-voltage switching devices, electrotechnical cases, cable and harness production for needs of the enterprises of nuclear branch and military-industrial complex. Production is aimed at production of cable and harness products, output mounting (DIP-mounting) of printed circuit boards, Assembly and installation of electrical equipment, manufacture of high-pressure hoses with a diameter of up to 47 mm.

“Ecomash+Ural” OOO has **additional competences**: electromechanical vibrating stand, installation for measurement of parameters of electric circuits, the flexible welding chamber from heat-resistant silicone for welding of the titan and special steels in the protective environment, the electroerosive wire-cutting machine with CNC of multi-pass type, installation on laser marking and engraving of products.

“Ecomash+Ural” OOO is certified for compliance to requirements of GOST RV 0015-002-2012 **"system of development and delivery on production of military equipment"** (the military representation of 76 VP of MO of the Russian Federation is assigned to the enterprise). The company complies with the integrated management system **ISO 9001-2011**. We have a **license of the Federal service for environmental, technological and nuclear supervision № UO-(C)-12-101-2880 from 19.07.2018 for the manufacture of equipment (12) for nuclear installations**.

Thanks to highly qualified specialists, the use of a wide range of equipment, adherence to all accepted standards and quality control of products at all stages of production, “Ecomash+Ural” OOO performs a full cycle of manufacturing parts with proper quality and on time.

We are ready for cooperation, negotiations and technical audit.

Additional information about our company will be sent upon your request.
